Strongman Coreless Roll Can Liners

Made with a combination of LLDPE and LD resins. LLDPE has a high tensile strength and high impact, chemical resistance and puncture resistance. LD is the most common plastic used to make can liners, as it is soft and flexible. By blending it with LLDPE, strength increases without losing the thinner mil weights and flexibility. Has a star-seal bottom. Perforated coreless roll.

Can Liners

Pitt Plastics Interleaved Roll Can Liners

Our High Density Can Liners provide a unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins. They are puncture resistant, possess impressive film strength and perform under temperature extremes of -40F to 212F. As an added bonus, the formulation of the high density bag confines odors. High Density liners are USDA and FDA approved for food use.

Pitt Plastics Mini-Roll Can Liners

The unique blend of first grade high molecular weight High Density Polyethylene and LLDPE resins is puncture resistant, possesses impressive film strength and performs under temperature extremes of -40°F to 212°F. The high molecular weight of the High Density Polyethylene resin allows us to produce can liners that are approximately one-third the weight of traditional can liners with the same capacity. A lower weight bag of superior strength means less material is being used in production, making the High Density Mini-Roll a good choice when searching for a product sensitive to source reduction responsibility. Perforated for easy dispensing.

Elkay® TUF-R® Linear Low Density Gusset Bags

Tuf-R® Linear Low Density Polyethylene (LLDPE) bags provide extra strength and puncture resistance compared to low density bags of the same gauge. Because of this, it's often possible to use a lighter gauge Tuf-R® bag to do the job of a heavier gauge LDPE bag, which saves money and helps to reduce the environmental impact. Tuf-R® bags are made from virgin materials, so they comply with USDA and FDA requirements for use in food applications.

Dart® Foam Hinged Lid Containers

Hinged containers available non-perforated or with the PERFormer™ perforated hinge that allows the container's lid to be removed. Stackable. Secure closure. Has high insulation properties to keep hot food hot and cold foods cold. The vented container comes with the PERFormer™ perforated hinge. Vent holes on sidewalls of the lid preserve food quality (i.e. crispiness) by allowing steam to escape. These containers feature either a double lock closure or a "knuckle" locking tab intended to prevent accidental openings. When closed, a perimeter seal keeps food secure, reducing leaks. Tabs on base ensure container stay closed when picked up by the lid. Also available in black. *Denotes Removable Lid

Dart® Impulse® LX® Foam Cups

Customers shouldn't need to rely on "double cupping" their paper hot cups to avoid burning their fingers. Dart's Café G® stock printed foam cups keep hot beverages hot and cold beverages cold while remaining comfortable to the touch. Because this premium line of insulated ThermoGlaze® cups keeps beverages at their proper serving temperature, coffee will taste fresher longer than when it's served in a paper cup. The Café G coffee-themed design incorporates a subtle color coding system to help customers and employees identify the correct cup size.

Fresh Easy Fresh® 2.0 Cover w/Batteries

Powerful enough to freshen even your largest spaces, Easy Fresh is the world's only air freshener dispenser that uses the fragranced cover of the dispenser as the air freshener refill itself! Now you can save yourself time and energy with a product that makes replacement easy. The Easy Fresh fragranced cover is composed of a unique material containing 2-3 times more fragrance than gels or metered aerosols. The motor-driven fan moves fragrance further than a typical passive system, thus freshening larger areas. The smart system behind the Easy Fresh releases approximately the same amount of air freshener daily over 30 days by turning the fan sparingly in week 1, and gradually turning it more frequently until week 4 when the fan runs constantly. The smart dispenser comes with a light that alerts you to change your cover after 30 days, and begins counting down another 30 days once you change the cover!

Rubbermaid® Web Foot® Shrinkless® Wet Mops

Contains antimicrobial product protection, which inhibits the growth of bacteria that cause odors, stains and shortens useful product life. 4-ply, balanced blend of cotton and synthetic yarn is pre-laundered. Looped ends and tailbanding reduce tangling for like-new performance after every laundering. Colorfast colors will not fade with repeated launderings.

FGA25306BL00 Large Blue 5" 6/cs

Rubbermaid® Web Foot® Wet Mops

Balanced blend of cotton and synthetic fibers delivers up to five times the absorbency of cotton mops. Contain antimicrobial product protection, which inhibits the growth of bacteria that cause odors and stains. Looped-end, open-twist yarn reduces linting. Tailband allows the mop to cover more floor area per stroke, saving time and money.

FGA11206WH00 Medium White 1" 6/cs

White Cotton/Synthetic Blend Wet Mops

Versatile, requires little break-in. Looped ends keep mops from fraying and linting. Tailband provides wide surface coverage without gaps while preventing tangles.
